

PiiTii Metal chairs

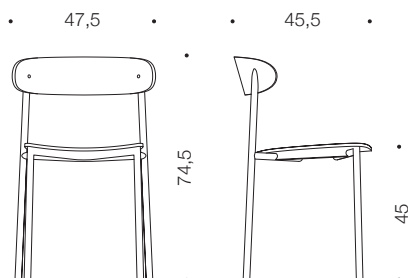

Design Mikko Halonen

The metal chair from the PiiTii collection is a compact, durable, stackable universal chair. The finished details, durable materials and the possibility to choose the frame colour and upholstery fabric according to the conditions of the space make the chair a versatile and flexible tool for decorators.

The upholstery is replaceable. Hence, the chair can enjoy a long service life. The shape of the form-pressed veneer guarantees good ergonomics for the user and gives a pleasant visual look to the chair. Versions with and without armrests are available. The chair comes with several upholstery options.
