

TEMPO t33 chair

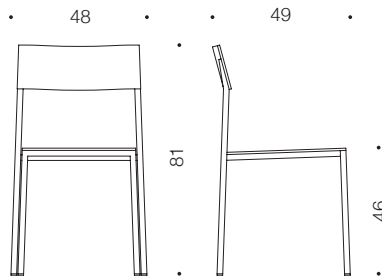

design Timo Saarnio, 2012 & 2016

The dignified Tempo t33 chair suits locations looking for a classic and timeless atmosphere. The appearance of the Tempo chair is delicate; the chair can be stacked efficiently. The legs and the horizontal frames are square 20x20 mm steel pipe.

The seat and the backrest are form-pressed plywood. The chair is available with seat upholstery. Glides for the legs come as standard. The chairs can be stacked in piles of 15 on the floor or trolley, and upholstered chairs in piles of 12.
