

# KORE metal chair

design Mikko Halonen

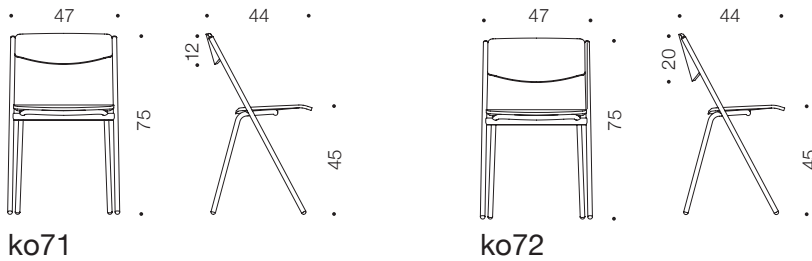

Kore collection is designed for canteens and cafes. It is also a good choice for modern learning environments. Thanks to its compact size, it is possible to have maximum seating without compromising seat comfort.

The Kore chair and table with steel frame complete the Kore collection. The ease of maintenance has especially been considered. Kore chair can be hung under the Kore table (ko70), between the tabletop and frame, making the floor and tabletop cleaning easy. No additional hanging equipment is needed.

Kore ko71 is suitable for general use, such as adult education spaces, whereas ko72, with a larger backrest, is recommended for primary schools.
