

HAI

design Jouni Leino

The HAI collection is designed for spaces where you work, discuss, study, or relax. The HAI sofa is comfortable to sit in at bar height. The table's diamond-shaped top makes it easier to sit and stand up from the sofa or chair.

It's pleasant to talk around the HAI collection when everyone, sitting or standing, can keep eye contact. Interaction is relaxed, and there's no need to stand up if a passerby stops to talk with their colleagues for a moment.

The HAI collection includes a sofa, a chair, and a table in standard size. The upholstery can be made to fit the interior design plan. The table top is compact laminate as standard.
