

# TEMPO

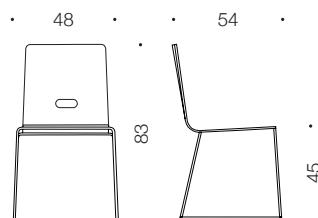

## t32 chair

design Timo Saarnio

The Tempo t32 chair features a 10x10 mm steel wire frame for durability and efficient stacking. Its slim profile supports flexible layouts in restaurants, cafés, and congress centres.

A discreet connector allows chairs to be linked for multipurpose spaces. The compact size enables storage e.g., under a stage. An optional grabbing hole in the backrest and a chair trolley makes handling straightforward.

Tempo t32 chair adapts to changing spatial needs, offering reliability and utility for contemporary projects.
