

KARI-SALUS50

Wooden chair for care environments

Design Kari Asikainen

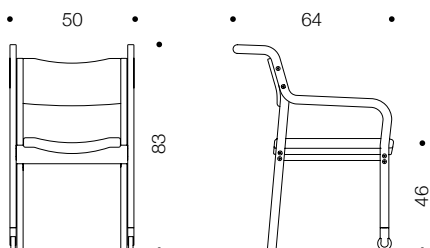

The Kari-Salus50 is a form-pressed birch veneer chair equipped with front-leg castors and integrated push handles to support assisted movement in care and assisted living environments.

The chair features rounded armrests to enhance seating comfort and usability. The seat is designed with integrated moisture protection and removable upholstery for ease of maintenance.

Kari-Salus50 is compatible with Kari tables and seating systems.

KARI-SALUS50
