

TEMPO t35 wooden chair

design Timo Saarnio

Tempo t35 is a collection of universal wooden chairs with a refined, minimalist character. A solid wood frame is discreetly integrated beneath the thin, form-pressed seat and backrest, creating a light and simplified appearance.

Despite its straight and reduced form, the chair offers a high level of seating comfort thanks to a carefully shaped seat recess. Comfort and functionality can be further enhanced with upholstered seat and backrest options or by selecting a version with armrests.

Tempo t35 is also available in narrow and barstool heights, making it suitable for a wide range of contract environments.

TEMPO t35k wooden chair

design Timo Saarnio

Tempo t35 with armrests is part of the Tempo collection of universal wooden chairs. A solid wooden frame is concealed beneath the thin, form-pressed seat and back, giving the chair a simplified and light appearance. The integrated wooden armrests add support and functionality while maintaining the chair's refined character.

Despite its straight form, the Tempo chair with armrests is highly comfortable thanks to a recessed seat. Comfort and ease of use can be further enhanced with an upholstered seat and backrest. The chair can be fitted with a row connector.

TEMPO t35k/HW

Wide wooden chair

design Timo Saarnio

Tempo t35k/HW is an extra wide wooden chair designed for public interiors, combining clear structural logic with a light-weight and precise expression. The angular, linear design is supported by a robust solid wood frame and a separate seat and backrest construction.

A shaped, circular recess in the seat adds visual character to the chair while enhancing ergonomics. The gently curved backrest supports an upright sitting posture, connecting to tapered rear legs to create a refined, light appearance. A support rail integrated beneath the seat reinforces stability while maintaining a clean and consistent structure.

Part of the Tempo collection, the wide model extends seating width without compromising visual consistency. Its proportions make it particularly suitable for inclusive seating applications, supporting comfort and accessibility within unified interior schemes.

t35k/HW/50, seat height 50cm, shaped recess, crown cut ash
