

HUUP

Design Jouni Leino

Huup is a modular seating collection with a clear aesthetic and a touch of wit. Made from high-quality materials, the modules are suitable for a wide range of public interiors, including lobbies, corridors, lounges, shops, showrooms, museums and educational environments.

The collection includes bench modules as well as versions with armrests, tables and backrests. Modular components can be combined and expanded to create seating arrangements that suit different spaces and applications.
