

PIKKU-KARI Chairs

Design Kari Asikainen

Pikku-Kari is a compact children's chair from the Kari collection, designed by Kari Asikainen in the 1980s. Based on the same aesthetic, ergonomic approach and durable wooden construction as the Kari series, it is made for active daily use in public children's environments.

The chair is available in six sizes and in two versions: with or without armrests. Its compact, square form is easy to place, while the rounded shapes make it safe and comfortable for children's spaces. Back glides help prevent the chair from tipping backwards during use.

Lightweight to handle and easy to clean, Pikku-Kari is a practical choice for demanding everyday environments. The seat and backrest can be coloured according to the interior design plan.

Suitable for kindergartens, childcare facilities, pre-schools, libraries and public waiting areas for children.
