

TEMPO t35 wooden chair

design Timo Saarnio

Tempo t35 is a collection of universal wooden chairs with a refined, minimalist character. A solid wood frame is discreetly integrated beneath the thin, form-pressed seat and backrest, creating a light and simplified appearance.

Despite its straight and reduced form, the chair offers a high level of seating comfort thanks to a carefully shaped seat recess. Comfort and functionality can be further enhanced with upholstered seat and backrest options or by selecting a version with armrests.

Tempo t35 is also available in narrow and barstool heights, making it suitable for a wide range of contract environments.
