TEMPO t39 sofa modules

design Timo Saarnio

The versatile Tempo t39 sofa modules can be configured into various seating solutions to meet the unique needs of each customer. The sofa frames are made from steel tubing and birch veneer, while the upholstered sections feature foam and wadding. Customers have the option to choose their preferred fabric.

These sofa modules are designed with specific dimensions to ensure a comfortable sitting experience. They allow for easy sitting and standing. The seat height is 45 cm.

The available heights for the sofa modules are 78 cm and 130 cm. Additionally, there is a roofed option available at 150 cm (t39ka). Special measurements can be provided for project-specific products.

TEMPO t39k sofa modules

design Timo Saarnio

The Tempo t39k is an adaptation of the classic Tempo t39 sofa. This version features high sides and a roof, providing privacy and creating an acoustic space. When individuals need a sense of seclusion or their own personal area, the Tempo t39k is an excellent option.

The Tempo sofa can be customized to meet the specific needs of customers. It is constructed from a steel tube frame and birch veneer, with upholstered sections made from foam and wadding. Customers can select their preferred fabric.

The standard seat height is 45 cm. Please inquire for quotes on alternative seat heights.

There are two available module heights: 130 cm for the version without a roof and 150 cm for the roofed version.
